PROJECTS

The Book Review App
- MongoDB, Express.js, ReactJS, Node.js
- On my 6th project, I was able to practice the MERN stack. This app will be useful for people who loves reading books as it can help them finding a new book to read after finishing one.

Backend API
- Node.js, Express.js
- My fifth project, same concept as the Resto App project but now I started experiencing a framework being used in backend.

Resto App
- E-Commerce React App
- My fourth project using React JS that allows users to order, check their cart and see their total bill to the restaurant.

To Do List App
- React JS
- This third project is a tool that implements the functioning of a To-Do list using React JS where you can add or delete a task you've created. I've made it organized that you can see your done and pending tasks on different tabs.

Whack-Pickle-Rick
- HTML, CSS, JavaScript
- My second project and first ever to use a JavaScript language where I designed and created my own game. It was fun as I was able to pick my my favorite cartoon Rick & Morty as my design.

Web Developer Portfolio
- HTML, CSS, ReactJS
- My first project as an aspiring Web Developer. The requirement is to make our own Web Developer Portfolio using HTML & CSS. I was able to design my own website at the same time dream being a successful Web Developer. By the end of the bootcamp, I was able to redesign and convert it into ReactJS.

EDUCATION

Full-Stack Web Development Bootcamp
Uplift Code Camp / Quezon City

05/2022 - 11/2022

Bachelor of Science in Biology major in Human Biology
De La Salle University - Dasmariñas / Dasmariñas, Cavite
